
World Consumer Income and Expenditure Patterns

2012

12th edition

Euromonitor International Ltd. 60-61 Britton Street, EC1M 5UX

Summary of Contents

Section 1 - Introduction	1
Section 2 - Socio-economic parameters	21
Section 3 - Annual household income	43
Section 4 - Annual per capita income	51
Section 5 - Tax & social security	59
Section 6 - Annual gross earnings	63
Section 7 - Annual gross income by source	71
Section 8 - Gini coefficient	83
Section 9 - Annual disposable income by sex	85
Section 10 - Household annual disposable income by decile	93
Section 11 - Household annual disposable income brackets	121
Section 12 - Consumer expenditure	133
Section 13 - Consumer expenditure by commodity	141
Section 14 - Consumer expenditure by purpose	151
Section 15 - Country snapshots	201

Table of Contents

Section 1 – Introduction	1
Scope of the Yearbook	3
Section Two: Socio-Economic Parameters.....	3
Section Three: Annual Household Income	3
Section Four: Annual Per Capita Income	3
Section Five: Tax & Social Security	3
Section Six: Annual Gross Earnings	3
Section Seven: Annual Gross Income by Source	3
Section Eight: Gini Coefficient.....	3
Section Nine: Annual Disposable Income by Sex.....	4
Section Ten: Household Disposable Income by Decile	4
Section Eleven: Household Annual Disposable Income Brackets	4
Section Twelve: Consumer Expenditure	4
Section Thirteen: Consumer Expenditure by Commodity.....	4
Section Fourteen: Consumer Expenditure by Purpose	4
Section Fifteen: Country Snapshots.....	4
Table 1.1: Exchange rates against the US\$ 1990-2010	5
Table 1.2: Purchasing power parity conversion factor 1990-2010	6
Glossary of Terms	7
Income Distribution.....	7
Consumer Spending.....	8
General.....	15
Sources and Methodology	15
Income Distribution.....	15
Consumer Spending	19
Disclaimer.....	19
Section 2 – Socio-economic parameters	21
Population	22
Table 2.1: Population: National Estimates at January 1st 1990/1995/2003-2010	22
Table 2.2: Males: January 1st 1990/1995/2003-2010	23
Table 2.3: Females: January 1st 1990/1995/2003-2010.....	24
Table 2.4: Population Aged 0-14: January 1st 1990/1995/2003-2010	25
Table 2.5: Population Aged 15-64: January 1st 1990/1995/2003-2010	26

Introduction

1

Introduction

Scope of the Yearbook

World Consumer Income & Expenditure Patterns 2012 is an amalgamation of Euromonitor International's former World Income Distribution, and World Consumer Spending titles. The book features an unprecedented wealth of detailed statistics on income distribution and spending habits in 71 major world economies. The level of detail previously found in the two separate titles has been retained, and has been supplemented in this edition with some new breakdowns. To assess how income distribution and consumer expenditure patterns have changed in the first decade of the new millennium, tables contain detailed annual data for 1990, 1995, and 2003-2010.

Following this introduction, World Consumer Income & Expenditure Patterns is divided into 14 data sections.

— Section Two: Socio-Economic Parameters

Within all the countries of the world, there are a significant number of socio-economic and demographic influences which affect consumer income and expenditure patterns. This section provides a summary of these basic facts and figures and includes population, number of households and associated data, Gross Domestic Product, annual inflation, and employment indicators.

— Section Three: Annual Household Income

This section provides comparative trends for 1990-2010 for gross and disposable household income. The data are presented in US\$, at both current and constant prices, and in terms of purchasing power parity (international \$).

— Section Four: Annual Per Capita Income

Data in this section cover the same parameters as featured in Section Three, but in per capita terms.

— Section Five: Tax & Social Security

This section looks at the importance of tax and social security contributions as a proportion of gross annual income, as well as showing these contributions in per capita terms.

— Section Six: Annual Gross Earnings

Data in this section feature gross earnings per household, per capita and per employed person at both current and constant US\$.

— Section Seven: Annual Gross Income by Source

This section presents annual gross income from employment, benefits, investment and other sources in per capita terms, at both current and constant US\$.

— Section Eight: Gini Coefficient

The single table in this section shows the Gini Index which shows how equally or unequally, income is distributed amongst the population.

— **Section Nine: Annual Disposable Income by Sex**

Data in this section present annual per capita disposable income trends by sex, at both current and constant US\$. Users will be able to track trends in the disparity between male and female income by country.

— **Section Ten: Household Disposable Income by Decile**

The 26 tables in this section show household disposable income by decile (1 being the 10% of households with the lowest incomes, and 10 being the highest 10%), in constant US\$ as well as in purchasing power parity (international \$). It also includes a couple of tables looking at the ratio between deciles 5 and 10 with decile 1.

— **Section Eleven: Household Annual Disposable Income Brackets**

This section features household annual disposable income across 15 income brackets. These, in turn, are split into low income, middle income and high income households.

— **Section Twelve: Consumer Expenditure**

This section presents an overview of consumer expenditure data and shows overall and per capita trends, consumer expenditure as a proportion of GDP, and consumer expenditure by commodity and by purpose. Data are shown at current US\$.

— **Section Thirteen: Consumer Expenditure by Commodity**

Data in this section look in more detail at overall and per capita trends in consumer expenditure by durable goods, semi-durable goods, non-durable goods, and services.

— **Section Fourteen: Consumer Expenditure by Purpose**

This section shows consumer expenditure breakdowns across the 12 broad consumer expenditure categories. These 12 broad categories have been further broken down through meticulous Euromonitor International research into 67 sub-categories to allow the user to isolate spending on, for example, rail travel or package holidays. Each of the 67 detailed expenditure sub-categories are consistent with national accounts aggregates adding up to Private Final Consumption which in turn is a major component of a country's GDP, according to the expenditure approach. This allows the analyst to observe expenditure trends on a particular item or service in the context of the others as well as of the country's economy as a whole.

— **Section Fifteen: Country Snapshots**

Using the same standardised approach followed in Sections Two to Fourteen, this section deals with each of the 71 countries in turn, presenting socio-economic parameters, annual household and per capita gross and disposable income, tax and social security contributions, annual gross earnings, annual gross income by source, Gini coefficient, annual disposable income by sex, household annual disposable income by decile, number of households by annual disposable income bracket, overall and per capita consumer expenditure trends, consumer price indices, and consumer expenditure by purpose and by commodity type. These parameters are shown under a series of standard headings, thus allowing review of the key facts and figures on changes in consumer income distribution and spending habits within each country.

Due to rounding some of the data may not add up to the totals.

As part of the comparative process, units have been converted to an internationally comparable unit (the US dollar) and the exchange rates used for converting national currencies are given in the table below. It should be noted, however, that time series at dollar rates can give a distorted reflection of income distribution and expenditure trends due to variations in exchange rates. Therefore conversions to US dollars sometimes only reflect the strengths of various currencies against the US currency. However, US dollar values, as well as per capita US dollar values, for a single year are a useful comparative indicator. Population figures used for per capita calculations can be found in Section Two.

Number of Households by Type (%) 2010

Table: 2.11

% of total households

	Single person	Couple without children	Couple with children	Single-parent family	Other
