Introduction

This second edition of the World Directory of Business Information Sources is a comprehensive, one-stop resource that provides details on the hundreds of business information sources used by Euromonitor International analysts, researchers and staff to produce the company's award-winning databases and research products.

Organisations listed in World Directory of Business Information Sources range from official government and international bodies to a variety of private organisations, from trade associations to market research publishers. These organisations and their publications focus primarily on consumer market information, although many cover industrial markets, as well. In addition, Source: Euromonitor lists key business journals and their publishers, as well as major business information web sites and online databases.

The directory has full contact details for more than 7,200 market information providers, together with details of their activities and publications and includes over 11,385 publications and 5,900 web sites.

—Publication(s)

World Energy Outlook — **Content:** Covers energy market reform, energy policy and projections. Projects the impact that targeted policies and more robust deployment of energy technologies could have on sustainability through to 2030 **Frequency:** monthly **Language:** English

World Energy Statistics — **Content:** Provides annual historical energy data extracted from four IEA/OECD data bases: energy statistics and energy balances, which contain data for most of the OECD countries from 1960 and energy statistics and balances for more than 100 non-OECD countries from 1971 **Frequency:** annual **Language:** English

Key World Energy Statistics — **Content:** contains statistics on the supply, transformation and consumption of all major energy sources **Frequency:** annual

Energy Prices and Taxes — **Content:** International compilation of energy prices at all market levels: import prices, industry prices and consumer prices. The statistics cover main petroleum products, gas, coal and electricity, giving for imported products an average price both for importing country and country of origin **Frequency:** quarterly **Language:** English

Energy Balances of OECD Countries — **Content:** Contains data on the supply and consumption of coal, oil, gas, electricity, heat, renewables and waste presented as comprehensive energy balances expressed in million tonnes of oil equivalent. Historical tables summarise production, trade and final consumption data as well as key energy and economic indicators **Frequency:** annual **Language:** English/French

Coal Information — **Content:** Part I provides a statistical overview of developments in the world coal market. It covers world coal production and coal reserves, coal demand by type (hard, steam, coking), hard coal trade and hard coal prices.

Part II provides, in tabular and graphic form, a more detailed and comprehensive statistical picture of historical and current coal developments in the 30 OECD Member countries, by region and individually **Frequency:** annual **Language:** English/French

Oil Information — **Content:** Gives current developments in oil supply and demand. The first part of this publication contains key data on world production, trade, prices and consumption of major oil product groups, with time series back to the early 1970s.

The second part gives a more detailed and comprehensive picture of oil supply, demand, trade, production and consumption by end-user for each OECD country individually and for the OECD regions **Frequency:** annual

Electricity Information — **Content:** Part I provides a statistical overview of developments in the electricity and heat market.

Part II provides, in tabular form, detailed and comprehensive statistical coverage of the power and heat industry developments for each of the 30 OECD Member countries and for OECD and IEA regional aggregates **Frequency:** monthly **Language:** English/Russian

Renewables Information — **Content:** Part I provides a statistical overview of developments in the markets for renewables and waste in the OECD Member countries. It also provides selected renewables indicators for non-OECD countries.

Part II provides, in tabular form, a more detailed and comprehensive picture, including preliminary data, of developments for renewable and waste energy sources for each of the 30 OECD Member countries. It encompasses economic and energy indicators, generating capacity, electricity and heat production **Language:** English/Spanish

Natural Gas Information — **Content:** information on LNG and pipeline trade, gas reserves, storage capacity and prices. The main part of the book, concentrates on OECD countries, showing a detailed supply and demand balance for each country and for the three OECD regions: North America, Europe and Pacific, as well as a breakdown of gas consumption by end-user. Import and export data are reported by source and destination **Frequency:** annual **Language:** English

Energy Balances of Non-OECD Countries — **Content:** Contains data on the supply and consumption of coal, oil, gas, electricity, heat, renewables and waste presented as comprehensive energy balances, expressed in tonnes of oil equivalent for over 100 non-OECD countries. Historical tables summarise production, trade and final consumption data as well as key energy and economic indicators

Energy Statistics of Non-OECD Countries — **Content:** contains data on energy supply and consumption in original units for coal, oil, gas, electricity, heat, renewables and waste for over 100 non-OECD countries. Historical tables summarise data on production, trade and final consumption. The book includes definition of products and flows and explanatory notes on the individual country data **Frequency:** annual **Language:** English/French

CO2 Emissions from Fuel Combustion — **Content:** study of emissions of CO2 from 1971 to 2004 for more than 140 countries and regions by sector and by fuel. Emissions were calculated using IEA energy databases and the default methods and emission factors from the Revised 1996 IPCC Guidelines for National Greenhouse Gas Inventories **Frequency:** irregular **Language:** English/French
